

New Hampshire PDMP

New Hampshire PDMP

The New Hampshire Controlled Drug Prescription Health and Safety Program was authorized in June 2012 for the purpose of enhancing patient care, curtailing the misuse and abuse of controlled substances, combating illegal trade in and diversion of controlled substances, and enabling access to prescription information by practitioners, dispensers, and other authorized individuals and agencies.

The New Hampshire Department of Health and Human Services will administer and oversee the operation of the program and has contracted services with Appriss Health to develop and maintain a database that collects and stores prescribing and dispensing data for Schedule II, III, and IV controlled substances. Appriss Health's prescription drug monitoring program (PDMP), PMP AWA_Rx_E, is a web-based program that facilitates the collection, analysis, and reporting of information on the prescribing, dispensing, and use of controlled substances.

New Hampshire law requires that each dispenser submit information regarding each prescription dispensed for a Schedule II, III, or IV controlled substance. Each time a controlled substance is dispensed, the dispenser shall submit the information required by New Hampshire law to the PDMP database within 24 hours of the date the prescription was dispensed and veterinarian dispensers shall submit the information required by the New Hampshire law to the PDMP within (7) days of the date the prescription was dispensed.
